# Purchase confirmation is displaying the wrong date

## Priority and severity

P4 – Normal

## Description

After completing the purchase flow, the date shown on the confirmation message is not the current day date.

## Steps to reproduce

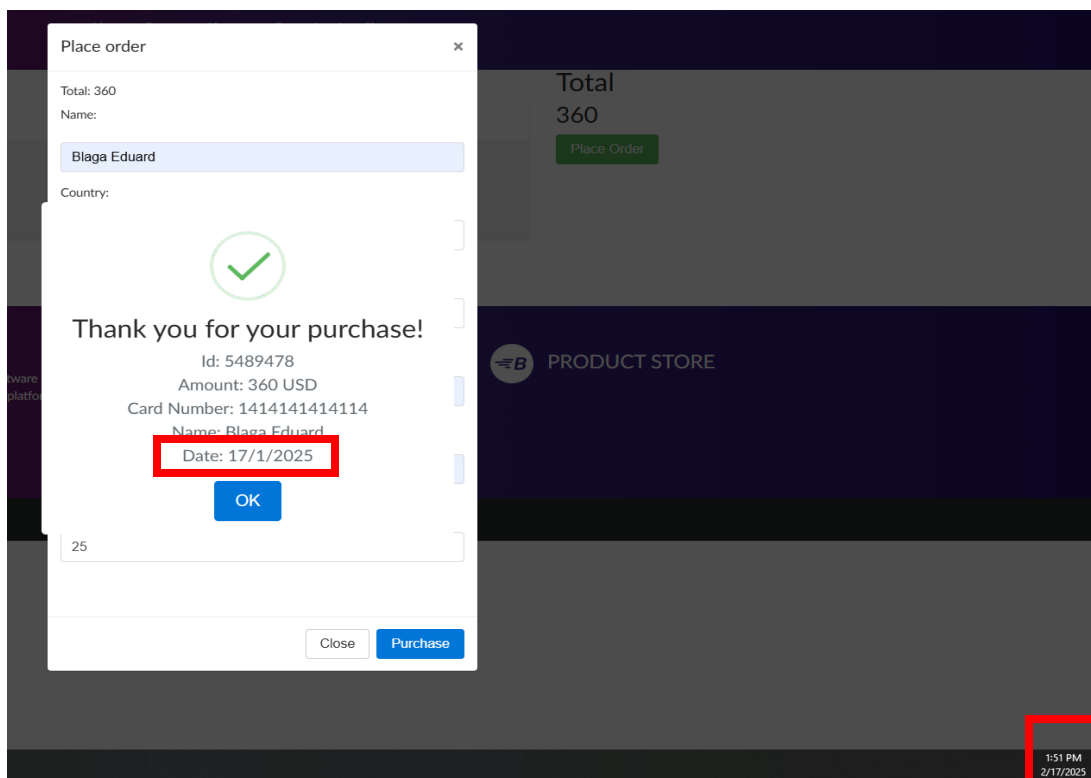

1. Go to <https://www.demoblaze.com>
2. Select a product and add him to cart
3. Go to Cart section
4. Place the order
5. Fill the text-fields and press Purchase

## Expected results

A confirmation message should appear with the same info we wrote in the fields and the current date of the day.

## Actual result

The date is not the same with the one we made the purchase.

## **Sorting function not updating the list on the first try**

### **Priority and severity**

P4 – Normal

### **Description**

When trying to sort the customers by first name, last name or post code by pressing on the appropriate link, it doesn't update on the first try. You have to press one more time.

### **Steps to reproduce**

1. Go to <https://www.globalsqa.com/angularJs-protractor/BankingProject/#/login>
2. Select Bank Manager Login
3. Select Customers
4. Press on the First Name text to sort customers by first name

### **Expected results**

The list of customers should be sort alphabetically by their first name.

### **Actual result**

The list gets randomized.

## **The app is not responsive**

### **Priority and severity**

P3 – Normal

### **Description**

The application lacks the responsiveness function.

### **Steps to reproduce**

1. Go to <https://www.globalsqa.com/angularJs-protractor/BankingProject/#/login>
2. Press F12
3. Select Device Toolbar on the top left

### **Expected results**

Application interface should be readable.

### **Actual result**

The apps interface is not fully readable.

## Missing sticker on the web page

### Priority and severity

P4 – Normal

### Description

The application has a missing sticker that it should appear after selecting number four in the cups of coffee field.

### Steps to reproduce

1. Go to <https://www.globalsqa.com/angularJs-protractor/ConsumptionCalculator/>
2. Increase the number for cups of coffee to four

### Expected results

A sticker should appear on the right margin on the page. On the mockup, the sticker shows a cup of coffee crossed diagonally with a line.

### Actual result

The sticker is missing, nothing appears.

### Angular Consumption Calculator

Today,

I had  cups of coffee

×  mg of caffeine per cup

≈  mg of caffeine.

You have exceeded the daily maximum intake of 400mg.

---

I had  cigarettes

## Bad interface design

### Priority and severity

P6 – Low

### Description

The application has a hidden sticker that appears when meeting a criterion, but it is not designed to fit properly on the page.

### Steps to reproduce

1. Go to <https://www.globalsqa.com/angularJs-protractor/ConsumptionCalculator/>
2. Increase the number for cigarettes to three

### Expected results

There should be a no-smoking sticker placed correctly on the page.

### Actual result

The sticker is too big.
